Suggested Movie-Making Programs*

Name	URL	Cost	Description	Notes
iMovie	www.apple.com/imovie/	$0	With iMovie for iOS and macOS, you can enjoy your videos like never before. It's easy to browse your clips and create Hollywood-style trailers and stunning 4K-resolution movies. You can even start editing on iPhone or iPad, then finish on your Mac. And when you're ready to premiere your movie on all your devices, iMovie Theater rolls out the red carpet.	• Only works with iOS devices • Students would need to record video and edit with iMovie
Plotagon Education	www.plotagon.com/education	$99/30 users	With Plotagon Education, you can create 3D animated characters and movies to show to your students, or turn ordinary writing assignments into rich animated moviemaking experiences.	• downloadable software (need 2GB free) • works on chromebooks • Full COPPA- and FERPA-compliant privacy policy
Alice	www.alice.org	$0	Students use this 3D programming environment to create animation. It is designed to be a student's first exposure to object-oriented programming. Alice allows students to learn fundamental programming concepts as they see firsthand the relationship between the programming statements they choose and the behavior of objects in their animation.	• Must be able to download software onto school computer(s) • Requires teacher to understand computer programming • Requires more classroom time as students must create everything: backgrounds, characters, actions, etc.

*Please note: The BizWorld Foundation cannot provide technical support for any of these movie-making programs. For questions, please refer to the different resources provided for the individual program you are using.

**For a low-tech option students can perform live skits in place of a movie making program.
