

Folding Directions

- Cut square of paper on solid lines.
- Fold the paper corner to corner (1 to 3 OR 2 to 4) to create a triangle.
- Fold the triangle in half to make a smaller triangle.
- Open the paper all the way up.
- Fold one corner into the center (text outside). Repeat with the remaining 3 corners. *You should be able to see the numbers/colors and the pictures/words.*
- Turn the paper over. *You should see the definitions of the words.*
- Fold one corner into the center, and repeat with the other 3 corners. *You should see only pictures/words.*
- Fold the square in half. Unfold and fold in half the other way. The numbers/colors should be on the outside.
- Insert your fingers under the numbered/colored flaps to create a diamond-like shape.
- From here, you can play with the fortune teller by picking a number/color, then choosing a picture/word and providing the translation. To check to see if you're correct, just lift the flap - the translation should be underneath!
